Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 8, 9, 11, 15, 16, 18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Rusznyak (USPN 4,697,097).

Fig. 1 shows a current source Q0/Q1 and a comparator Q2/Q4 (any circuit with a threshold can be seen as a comparator) arranged and functioning with currents as recited in claims 1 and 8. For example, the current through Q1 could be seen as the first current, the current through Q2 could be seen as the second current and the current through Q4 could be seen as the third current.

Further shown is a gain stage Q5/Q6 as recited in claim 3.

Claims 9, 11, 15, 16, 18 and 20 are anticipated for the reasons above.

3. Claims 1, 3-9, 11-16 and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Chung (USPN 5,959,477).

Fig. 3 shows a current source 4 and a comparator 6 and/or 8 (any circuit with a threshold can be seen as a comparator) arranged and functioning with currents as recited in claims 1 and 8. For example, the current through 12 could be seen as the first current, the current through 14 could be seen as the second current and the current

through 22 could be seen as the third current. Or for example, the current through 14 could be seen as the first current, the current through 22 could be seen as the second current and the current through 32 could be seen as the third current.

Further shown is a gain stage 10 as recited in claim 3.

Further show is a current mirror 12/14, a first transistor 16, a second transistor 18 and a resistance 20 as recited in claim 4.

Further show is a current mirror 22/32, a first transistor 26, a second transistor 34 and a resistance 28 as recited in claim 5.

Further shown is a first resistance 20 and a second resistance 28 defining scaled currents as recited in claims 6 and 7.

Claims 9, 11-16 and 18-20 are anticipated for the reasons above.

Conclusion

4. Claims 2, 10 and 17 are objected to as being dependent upon a rejected base claim, but may be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
